Activity diagram

Activity diagram is very important diagram in UML to describe the dynamic aspects of the system.

Activity diagram is basically a flowchart to represent the flow from one activity to another activity. The activity can be described as an operation of the system.

The control flow is drawn from one operation to another. This flow can be sequential, branched, or concurrent. Activity diagrams deal with all type of flow control by using different elements such as fork, join, etc

Figure of Activity Diagram for ATM.

Description of ATM Activity Diagram.

Here at first the customer will install his card and then pin it if the PIN is wrong then eject it and he will collect his card from the ATM. If the PIN is OK then he can avail all kinds of services such as checking the balance, Cash withdraw, etc.
